

CERTIFICATE OF COMPLIANCE REACH

In June 2007 the Regulation (EC 1907/2006) concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) came into effect. This regulation affects all sectors, including mechanical engineering and the automotive industry. The measures resulting therefrom depend on the function of the actor in the supply chain.

Under the provisions of REACH, the company GOTEC SA is a downstream user and thus not responsible for the pre-registration/registration of materials.

The pre-manufactured materials and consumables/auxiliaries required for the production of our products are supplied to us by our suppliers. Whereas we process their materials, our suppliers are responsible for the pre-registration and the later registration. We, as down-stream user in the supply chain, will, of course, fulfil our duty to inform.

To be able to continue supplying unlimited quality, we have already contacted our upstream supplier. According to information provided by them, pre-registration and the later final registration are already in the process of being implemented. According to the present status of information, the future purchase of precursors as a result of the implementation of REACH does not present a problem to our company.

For any further questions, please do not hesitate to contact us.

Manufacturer :

GOTEC SA
Route de Mangold 11
CH – 1958 St-Léonard

St-Léonard, 1st of September 2026
